DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 9/8/2008 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. The IDS includes (GB 2377575, GB 2370437, and EP 0947953) but did not provide any legible copy. It has been placed in the application file, but the information referred to therein has not been considered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Valerie Davis on 06/30/2008.

The application has been amended as follows:

In claim 10, line 1, please delete the word "claim 3" and insert "claim 1" before "wherein"

Allowable Subject Matter

3. Claims 1-2, 5, 7-11, 13-15, 17-20, and 22-23.

The following is an examiner statement of reasons for allowance: After reviewing the remarks made by applicant in response to the non-final office action and amending the claims to incorporate the subject matter allowable in the first office action, the examiner finds the remarks persuasive. Chandra et al (SVD based approach to transparent embedding data into digital images) teaches embedding a bit of data through slight modifications of SVs of a small block of the segmented covers. , the size of small Blocks is used as an attribute to achieve a tradeoff between the embedded data rate and robustness wherein the condition number of the operator increases by increasing the value of the largest singular value (see figure 1 and paragraph 2.1). Wong et al (A public key watermark for image verification and authentication) teaches embedding a digital signature extracted from the most significant bits of a block of the image into the least significant bit of the pixels in the same block. None teaches "generating at least a first ill-conditioned operator, said ill conditioned operator being related to values extracted from an image or portion thereof A; and replacing a non-zero singular value of a singular value matrix SA of an image or portion thereof A, with a solution to a linear equation comprising the ill-conditioned operator, wherein the non-zero singular value to be replaced is the smallest non-zero singular value S (A) in a singular value matrix SA. of rank r". The Examiner finds no reason or motivation to combine the above references in an obviousness rejection thus placing the application in condition for allowance.

2. Any comments considered necessary by applicant must be submitted on later than the payment of the issue fee and to avoid processing delays should preferably accompany the issue fee. Such submissions should be clearly labeled, comments on statement of reasons for allowance.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NANCY BITAR whose telephone number is (571)270-1041. The examiner can normally be reached on Mon-Fri (7:30a.m. to 5:00pm).
